🌐 Seraj Eldeen Abdullah

### Summary

Software Engineer specializing in React.js, Next.js, and Node.js, with a strong focus on building high-performance, scalable web applications, and experienced in developing reusable components, designing front-end architectures, and optimizing user interfaces for enhanced performance. Skilled in integrating RESTful APIs and collaborating effectively with cross-functional teams.

### Experience

**AI Model Evaluator** 11/2024 – 03/2025 | Remote

- Generated training data to enhance AI model learning across various domains.
- Assessed AI outputs for accuracy, relevance, and performance improvements.
- Provided feedback and optimizations to refine AI-generated responses.

### Projects

**Panto** 08/2025

- Figma landing page template for furniture and home-interior design.
- Bilingual support with both Arabic and English translations.
- Customizable themes available in light and dark modes.

**PostgreStore** 07/2025

- PostgreStore is a full-stack PERN Project designed for modern eCommerce functionality.
- Implements full CRUD operations for product management, enabling seamless creation, editing, and deletion of items
- Built with Express.js, featuring JWT authentication, secure routing, and best practices for backend security.

**Hidaya** 06/2025

- Hidaya is a user-centric web platform created to raise awareness about the teachings and values of Islam.
- Features an elegant and responsive UI built with Tailwind CSS, showcasing Islamic habits and principles in a modern design
- Created using Next.js and TypeScript for enhanced performance, scalability, and developer experience

### Education

**Bachelor of Computer Science, University of Alexandria** Egypt  
3.4 CGPA

### Skills

**Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, MongoDB, PostgreSQL, Tailwind, Figma  
**Backend:** Node.js, Express.js, MongoDB, PostgreSQL  
**Tools:** Postman, Git
