SUMMARY

I am Seraj Eldeen Abdullah Mohamed, a Data Scientist with a strong foundation in software engineering. I combine clean engineering practices with analytical thinking to develop scalable data pipelines, perform insightful data analysis, and deliver high-performance machine learning solutions. My focus is on transforming complex data into clear, actionable business insights. I am prepared to contribute to building impactful, data-driven solutions.

PROJECTS

Customer Segmentation using RFM & KMeans 01/2026

- Performed data cleaning and preprocessing to prepare high-quality inputs for clustering.
- Engineered RFM features and identified segments using the Elbow Method and Silhouette Score.
- Clustered customers into actionable groups, e.g., VIP, Loyalists, Occasional, Lost

IBM Customer Churn Prediction 12/2025

- Built churn prediction models using Logistic Regression, Random Forest, and XGBoost, evaluated with ROC-AUC and accuracy.
- Improved model reliability through data cleaning, feature engineering, and EDA.
- Analyzed feature importance to identify key drivers of customer churn.

Predict Health-Metrics 12/2025

- Built regression models to predict blood pressure, evaluated using RMSE.
- Built classification models to predict diabetes outcomes, evaluated with accuracy and precision.
- Visualized health trends using Seaborn and Matplotlib to support interpretation.

EDUCATION

University of Alexandria, Egypt

Bachelor of Computer and Data Science

- Relevant Coursework: Machine Learning, Probability & Statistics, Discrete Mathematics, Data Visualization, Design and Analysis of Experiments, Survey Methodology

SKILLS

PowerBI, SQL, Python, Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn, Sklearn, Data Visualization, Git
